

SOLUTION ANALYST – GEOLOGICAL DATABASE MANAGEMENT SYSTEM (FUSION)

Company Description

Datamine is a world-leading provider of technology used to plan and manage mining operations. With offices in 16 countries, we provide solutions ranging from exploration data management and orebody modelling to mine planning and operations to over 2000 companies worldwide.

Datamine offers a range of mining software solutions including the Geological Database Management System (FUSION). This is a comprehensive data repository and management system for geological, geochemical, geotechnical, geophysical, QA/QC, mapping, surveying and other field data. All these data sources are combined into one common database for reporting and analysis.

The Position

The demand for our FUSION Software Solution has greatly increased and we anticipate further growth. For this reason, we're seeking a Solution Analyst to join the Datamine team who will contribute to the maintenance and expansion of the FUSION Solution across the African continent.
