DATAMINE

Production bundle for

MINING OPERATIONS

Datamine's Production Bundle for Mining Operations brings together material tracking, inventory management, reconciliation, operational analytics, and production control into one connected workflow for mining operations teams.

Gain trusted visibility across the mining value chain with integrated operational data, auditable material tracking, and real-time insight from mine to model through to shipment. Strengthen grade control through complete value chain transparency by standardising reconciliation, tightening model-to-plant alignment, and detecting grade, density, and volume differences earlier with automated reconciliation and end-to-end tracking. Support stronger plan compliance, reduce waste, improve head grade, and enable more confident operational decision-making.

Product	What it's for	Highlights
CENTRIC ANALYTICS	Operational metrics and analytics	Dashboards; KPI monitoring; Production performance analysis
MINEMARKET Inventory Management & Tracking	Material tracking & inventory management	Blending; Material tracking; Material genealogy; Full traceability; Stock management; ISA95 compliance
RECONCILOR	Mine reconciliation	Model to Mine through to shipment visibility; JORC / NI 43-101 compliance
CENTRIC OPS	Daily operations management and shift logs	Shift log data capture; Production reporting

GEOLOGY

Production bundle for

PROCESSING (METALS)

Datamine's Production Bundle for Processing (Metals) brings together production accounting, plant performance monitoring, blending optimisation for consistent plant feed, and inventory management into one connected workflow for metallurgical and processing teams.

Gain trusted visibility across the processing flow with auditable metallurgical accounting, trusted plant data, real-time operational insight, and integrated production data that validates inputs, automates mass balancing, and consolidates plant data to improve recovery and reporting certainty, improve reporting speeds, reduce metal losses, support feed consistency, enable earlier loss detection, and drive more confident operational decision-making.

Product	What it's for	Highlights
PRODUCTION ACCOUNTING	Metallurgical accounting	Metals Balancing & Accounting with compliance (AMIRA P754)
CENTRIC OPS	Plant operations monitoring	Throughput tracking; Performance metrics
MINEMARKET Inventory Management & Tracking	Blending optimisation and plant feed consistency	Material tracking; Blending; Stockpile management
CENTRIC ANALYTICS	Operational analytics	Performance dashboards; Process optimisation insights

DATAMINE

Production bundle for

PROCESSING (NON-METALS)

Datamine's Production Bundle for Processing (Non-metals) brings together material tracking, inventory visibility, reconciliation, operational analytics, and blending control into one connected workflow for processing operations teams.

Gain trusted visibility across the processing flow with auditable production data, real-time operational insight, and integrated tracking that supports feed consistency, stronger reconciliation, earlier discrepancy detection, and more confident day-to-day operational decision-making.

Product	What it's for	Highlights
CENTRIC OPS	Plant operations monitoring	Plant Ops & Performance; KPI Data capture & analytics
MINEMARKET Inventory Management & Tracking	Blending and plant feed consistency	Material tracking; Blending; Stockpile management
CENTRIC ANALYTICS	Processing metrics and analytics	Dashboards; KPI monitoring; Plant performance analysis

DATAMINE

Production bundle for

SHIFT & EQUIPMENT PERFORMANCE

Datamine's Production Bundle for Shift & Equipment Performance brings together shift planning, operational execution, equipment performance monitoring, and operational analytics into one connected workflow for shift supervisors and dispatch teams.

Gain trusted visibility across shift activities, equipment utilisation, downtime, and field operations with real-time operational insight that supports stronger coordination, faster response to disruptions, and more consistent operational execution.

Product	What it's for	Highlights
CENTRIC OPS	Shift execution and operations control	Shift planning; Activity scheduling; Shift logs; Handover support; Real-time shift visibility
CENTRIC ANALYTICS	Operational performance analytics	Shift performance dashboards; Equipment utilisation insights; Downtime analysis

DATAMINE

Production bundle for LOGISTICS

Datamine's Production Bundle for Logistics brings together inventory tracking, shipment execution, logistics coordination, and operational analytics into one connected workflow for mining logistics teams.

Gain trusted visibility across mine-to-port operations with integrated scheduling, material traceability, stockyard visibility, and real-time logistics insight that supports stronger delivery performance, reduced delays, lower demurrage exposure, and more confident shipment execution aligned to contract requirements.

Product	What it's for	Highlights
MINEMARKET Transport & Logistics	Shipping & logistics management	Shipment tracking; Demurrage reduction
MINEMARKET Inventory Management & Tracking	Port stockyard management	Inventory tracking; Spec-based blending to achieve contract targets (penalty avoidance)
CENTRIC ANALYTICS	Logistics analytics	Performance monitoring; Delivery insights

DATAMINE

Production bundle for

COMMERCIAL OPERATIONS

Datamine's Production Bundle for Commercial Operations brings together contract management, shipment coordination, inventory visibility, and commercial analytics into one connected workflow for mining commercial teams.

Gain trusted visibility across contracts, stock, logistics, and sales with integrated commercial data, product traceability, and real-time commercial insight that supports stronger margin control, reduced contract risk, improved fulfilment performance, and more confident commercial decision-making.

Product	What it's for	Highlights
MINEMARKET Sales & Marketing	Commodity sales management	Contract management; Pricing rules; Invoicing
MINEMARKET Transport & Logistics	Product delivery coordination	Shipment scheduling; Delivery tracking
MINEMARKET Inventory Management & Tracking	Product inventory visibility	Stockpile control; Product traceability
CENTRIC ANALYTICS	Commercial analytics	Revenue reporting; Contract performance
