

Role-based bundle for

STRATEGIC MINE PLANNERS

Datamine's Strategic Planner Bundle combines optimisation, design, and long-term scheduling in one integrated environment, enabling effective decision-making without disconnected tools.

Quickly test scenarios and update LOM plans for data-driven decisions. Save ~33%* with a single role-based subscription for long-term planning.

* When compared to standalone licenses

Product	What it's for	Highlights
 STUDIO NPVS	NPV-driven optimisation & scheduling for options.	Optimisation, NPV scheduling, scenarios, rapid testing.
 MSO	Stope shape optimisation for efficient extraction.	Maximises resource extraction with a proven stope optimiser.
 STUDIO OP	Open pit design & rapid iteration of strategies.	3D design, parametric updates, roads/ramps, rapid iterations.
 STUDIO UG	Design & reserving to convert strategy.	UG design & reserving, units, consistency, credibility.
 DTS	Scheduling to turn strategy into actions.	Scheduling, dependencies, equipment, updates.
 MINEMAX TEMPO	Optimised schedules and scenarios for LOM.	Scenario analysis and constraint-based schedule optimisation.
 MINETRUST	Governed data with traceable outputs.	Single source of truth with governance and version control.

Role-based bundle for OPERATIONS PLANNERS

Datamine's Operations Planner Bundle unites design, scheduling, and drill & blast for synchronized, flexible tactical planning.

Update plans to cut delays and rework. Save 33%* with a single tactical planning subscription.

* When compared to standalone licenses

Product	What it's for	Highlights
 STUDIO OP	Rapid open pit design updates for short- and medium-term planning.	Rapid updates, execution-ready designs, less rework, quicker response.
 STUDIO UG	Underground designs for consistent short-term execution.	UG workflows, reserving support, consistent outputs, improved continuity.
 MSO	Stope shape optimisation for efficient extraction.	Maximises resource extraction with a proven stope optimiser.
 DTS	Tactical scheduling for daily, weekly, and monthly cycles.	Tactical scheduling, sequencing, rapid updates, execution-ready outputs.
 MINEMAX TEMPO	Medium-term optimisation and scenario testing for robust, flexible plans.	Scenario testing, optimisation, constraint management, quicker trade-offs.
 AEGIS	Underground drill & blast design aligned to the plan.	Ring design, blast timing, schedule alignment, better execution control.
 DATABLAST	Open pit drill & blast: design, loading, timing, reporting.	D&B design, loading/timing, less rework from late changes.
 MINETRUST	Data control keeps designs, schedules, and D&B aligned.	Governance, version control, trusted handovers, less plan drift.

Role-based bundle for

SURVEYORS & TECHNICIANS

Datamine's Surveyor Technician Bundle combines daily survey workflows with governed spatial data control — so pickups, reporting, and month-end reconciliation don't depend on disconnected tools and spreadsheet patchwork.

Finish daily updates faster and close periods with confidence — with reconciliation-ready, reportable outputs. Save ~30% versus buying licences separately — while keeping spatial data controlled and audit-ready.

Product

What it's for

Highlights

STUDIO
SURVEY

Purpose-built tools for fast, reliable survey and spatial reporting.

Survey & spatial reporting; topography updates & spatial maintenance; volume calculations; CAD tasks; daily survey workflows; month-end reconciliation support.

MINETRUST

Governance and a single source of truth for spatial information used across teams.

Validation, governance & QC; version control; audit-ready outputs; controlled handover to engineering & planning; improved confidence in spatial data.
