

EXPENDITURE WATCH 2.0

Expenditure compliance with confidence

Expenditure Watch 2.0 is a web-based expenditure compliance platform that helps mining companies track, manage, forecast, and report exploration expenditure across their tenement portfolio. By connecting accounting data, exploration activities, and mineral title obligations into a single system, organisations gain greater visibility of expenditure commitments, compliance status, and reporting requirements across multiple jurisdictions.

Who uses:

- ✓ Tenement Managers
- ✓ Land Managers
- ✓ Tenure Managers
- ✓ Database Geologists
- ✓ Land & Assets Teams

VALUE PILLAR

Built for expenditure compliance

Designed specifically for the mining industry, Expenditure Watch helps organisations manage expenditure commitments against mineral title obligations while reducing the complexity of compliance reporting.

Portfolio-wide visibility

Gain a consolidated view of expenditure commitments, eligible expenditure, reporting requirements, and compliance status across your tenement portfolio.

Designed for modern operations

Built as a multi-user web platform, Expenditure Watch supports collaboration, centralised data management, and visibility across teams and jurisdictions.

Supports expenditure compliance and reporting across multiple jurisdictions from a single platform.

OVERVIEW

A complete solution for expenditure compliance and reporting

Expenditure Watch 2.0 connects accounting data, exploration activities, and mineral title obligations into a single expenditure management workflow.

Whether preparing regulatory submissions, monitoring expenditure commitments, forecasting future requirements, or reviewing portfolio-wide compliance status, Expenditure Watch helps organisations access the information they need to make informed decisions.

Compliance monitoring

Monitor expenditure commitments against reporting obligations and identify potential compliance risks before critical deadlines.

Expenditure forecasting

Forecast expenditure requirements and monitor projected commitments to support planning and budgeting decisions.

Portfolio oversight

Access current expenditure information across all tenements from a single platform.

KEY FEATURES

Expenditure tracking and allocation

Track expenditure against mineral title commitments and allocate costs across projects and tenements with greater consistency and visibility.

Benefits

- Improve visibility of eligible expenditure
- Reduce manual reconciliation effort
- Support reporting accuracy

Compliance monitoring

Monitor commitments, expenditure requirements, and reporting obligations from a single system.

Benefits

- Identify at-risk tenements earlier
- Monitor compliance status continuously
- Improve reporting confidence

Automated expenditure reporting

Generate expenditure reports and support regulatory submissions using current expenditure information.

Benefits

- Reduce reporting preparation time
- Improve consistency
- Minimise manual effort

Portfolio-wide reporting

View expenditure commitments, compliance status, reporting requirements, and expenditure performance across your entire tenement portfolio from a single platform.

Benefits

- Improve planning and budgeting confidence
- Identify potential expenditure shortfalls earlier
- Support proactive compliance management

Early warning indicators

Identify upcoming obligations, expenditure gaps, and tenements that may require attention before reporting deadlines are reached.

Benefits

- Reduce the risk of missed commitments
- Prioritise compliance activities effectively
- Address issues before they become compliance risks

WHY EXPENDITURE WATCH?

Improve visibility

Access expenditure commitments, compliance status, and reporting requirements from a single source of information.

Reduce reporting effort

Streamline expenditure reporting processes and reduce the time required to prepare submissions.

Support compliance

Monitor obligations, identify risks earlier, and improve confidence in expenditure reporting.

Make better-informed decisions

Use current expenditure and commitment information to support planning, budgeting, and portfolio management.
